

# The PREP08 Wiki

- SLU has a commitment to host the PREP08 Wiki site for the indefinite future, and you will retain your account on it.
- The Wimba archives will be publicly viewable (in some form) for the indefinite future.
- The PREP08 Wiki is viewable (though not editable) by the public.
- In the long term, the PREP 08 Wiki is not the appropriate place to host course materials that you will actually use.

# The Math & Escher Wiki

- SLU has a commitment to host the Math & Escher Wiki site for the indefinite future. Our policy is that any educator who requests an account on the Math & Escher Wiki may receive one.
- The Escher Wiki is the textbook for a course we teach every semester at SLU. Treat it nicely, but don't be afraid to contribute. Read the Help page.
- You can use the Escher Wiki to host your course syllabus and web page, if you like.

# Wikibooks

- Library of online educational textbooks
- Part of Wikipedia
- Free content
- Future-proof
- High visibility
- Anyone can edit

# Math and Art Wikibook

- Near future (<1 year)
- Hosted on Wikibooks
- Based on EscherWiki, but with a broader scope
- Collaborative

# Concerns

- Teaching out of a text that anyone can edit.  
Editions?
- Instructor only material. Separate site?
- Rights to illustrations and artwork.

# PREP08 Materials

- In the long term, PREP08 course materials should move to either the Math & Escher Wiki or the Math & Art Wikibook (when/if it exists).
